

Study jam : Hello Git

A Study Jam for the Useless projects — Report

Event Name	Study jam : Hello Git
Organized By	TinkerHub SBCE Pattoor
Date	03 & 04 September 2026
Time	06:30 PM – 10:00 PM
Venue	Online

Event Overview

Study jam : Hello Git was a Study jam conducted for the for the students who attended useless projects on 03rd and 04th September 2026, from 06:30 PM to 10:00 PM , with nearly 25 students participating through Google Meet. The session was organized for students who had developed projects but needed guidance in deploying and submitting them properly . The Study jam focused on introducing students to GitHub and the TinkerHub app , helping them understand how to upload , manage , deploy , and submit their projects

The session provided participants with an opportunity to explore the basics of Git and GitHub, with a focus on deploying, managing, and submitting their projects. Through hands-on demonstrations, guidance, and practical activities, participants were able to follow the process and gain a better understanding of project deployment and submission.

The Study jam brought together students in an interactive learning environment, encouraging participation, collaboration, and peer learning. The session contributed to strengthening the participant's practical skills in using GitHub and the TinkerHub app, while helping them overcome challenges related to project deployment and submission.

Objectives

- To introduce students to the basics of Git and GitHub.
- To guide students in uploading and managing their projects on GitHub.
- To help students understand the process of project deployment and submission.
- To familiarize students with the TinkerHub app and its project submission process.
- To provide practical, hands-on guidance for completing and showcasing their projects .

Participant engagement during the online session

Outcome

The Study Jam helped students gain practical knowledge of GitHub, project deployment, and project submission. Participants were able to understand the steps involved in uploading their projects to GitHub and submitting them through the TinkerHub platform. The session also helped students overcome difficulties they faced while deploying and managing their projects, giving them greater confidence to work with development tools.

Conclusion

The Study jam : Hello Git was a successful hands-on learning session that helped students turn their existing projects into properly deployed and submitted projects. With nearly 25 students participating, the event provided a useful platform for learning, troubleshooting, and gaining practical experience with GitHub and TinkerHub
