

What's Hap-പെൺ-ing: She Builds

From Ideas to Technology – Event Report

Event Name	What's Hap-പെൺ-ing: She Builds (From Ideas to Technology)
Organized By	TinkerHub SBCE Pattoor
Speaker	Parvathy G Krishna
Date	18 September 2026
Time	08:30 PM
Venue	Online (Google Meet)

EVENT OVERVIEW

What's Hap-പെൺ-ing: She Builds was a specialized online interactive workshop organized by **TinkerHub SBCE Pattoor** on 18th September 2026 at 08:30 PM. Designed specifically as an exclusive session for female tech enthusiasts and aspiring innovators, the event aimed to promote technical engagement, project building, and entrepreneurship among women.

Led by speaker **Parvathy G Krishna**, the session brought together approximately 24 students through Google Meet. The core focus of the session was to demystify product development and guide participants on how to turn abstract ideas into actionable technology projects without being hindered by age or skill constraints.

Throughout the interactive program, participants explored real-world case studies of pioneering female tech founders –such as the creators of *Canva* and *Nykaa*. The session emphasized practical methodologies for conceptualizing ideas, structuring technical workflows, and delivering effective pitches to showcase innovation.

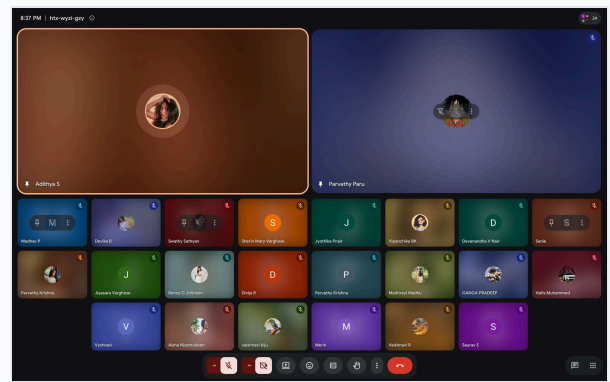

OBJECTIVES

- To empower women in technology through targeted mentorship and knowledge sharing.
- To highlight successful female entrepreneurs, developers, and global tech leaders.
- To provide actionable insights on validating ideas and executing them into functional products.
- To guide students on effective pitching techniques and overcoming early-stage building obstacles.
- To foster an inclusive and active community of female builders within the TinkerHub campus chapter.

Active engagement and discussion among attendees

OUTCOME

The *What's Hap-പെൺ-ing: She Builds* session provided participants with a structured understanding of turning concepts into technology products. Students actively engaged by asking targeted questions about idea validation, pitching strategies, and finding early development resources. The session instilled confidence in attendees to take up building projects without hesitation.

CONCLUSION

The event was a resounding success, creating a supportive ecosystem for women in tech at SBCE Pattoor. With nearly 24 participants actively taking part in discussions, TinkerHub SBCE Pattoor successfully reinforced its commitment to diversity, technical empowerment, and peer-to-peer learning.
