| Venue        | Online                                             |

## Event Overview

Frames of Onam was an online photography challenge organized by TinkerHub SBCE as part of the Onam celebrations, giving participants the chance to capture and showcase the vibrant spirit of Onam through their own photographic perspective.

The theme, **“Colours of Onam,”** focused on capturing a single photograph with multiple vibrant and contrasting colours. Participants could choose any subject, with emphasis on colour, contrast, and visual appeal — including traditional attire, flowers, decorations, celebrations, and food.

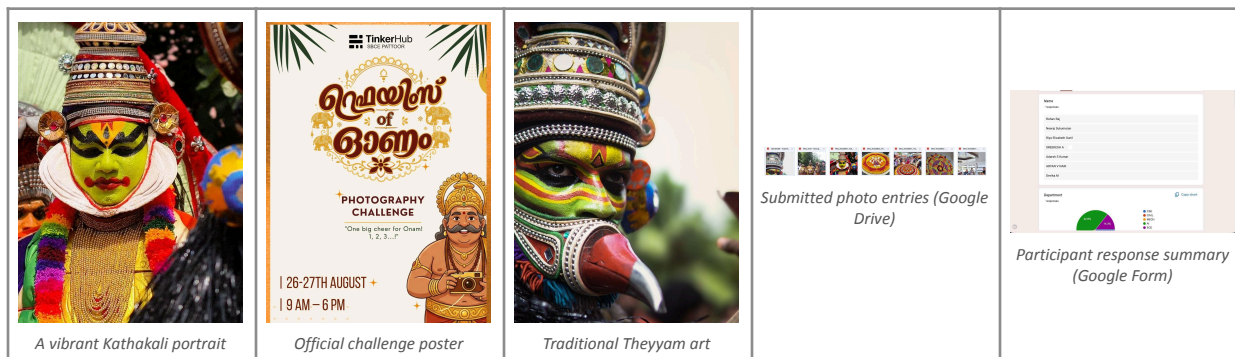

AI-generated or AI-edited photographs were not permitted. Basic adjustments such as brightness, contrast, exposure, and saturation were allowed, while heavy editing and manipulation were restricted. Participants were required to submit both the original/raw photograph and the edited/final version, ensuring authentic, original photography.

Through this challenge, participants were encouraged to look at the familiar colours and moments of Onam from their own unique perspectives and transform them into a visually striking single frame.

## Objectives

- To encourage students to explore and express their creativity through photography.
- To provide a platform for participants to showcase their photographic skills and individual perspectives.
- To capture the vibrant colours and festive spirit of Onam through a single frame.
- To encourage participants to experiment with colour, contrast, and composition.
- To promote visual storytelling through authentic and original photography.
- To engage students in a creative activity as part of the Onam celebrations.
- To encourage participants to observe and present familiar festive moments from unique perspectives.

## Event Highlights

## Outcome

- **Creative Expression:** Participants were provided with a platform to express their creativity and individual perspectives through photography.
- **Visual Storytelling:** The single-frame format encouraged participants to communicate the festive essence of Onam through colour, composition, and visual elements.
- **Photography Skills:** The challenge encouraged participants to pay attention to colour contrast, framing, exposure, and overall visual presentation.
- **Cultural Representation:** Participants captured different colourful aspects of Onam, contributing to a visual celebration of the festival.
- **Active Engagement:** The online photography challenge offered students an accessible and engaging creative activity during the Onam celebrations.

## Conclusion

The Frames of Onam – An Onam Photography Challenge successfully provided a creative platform for students to celebrate the spirit of Onam through photography. With “Colours of Onam” as its theme, the challenge encouraged participants to explore vibrant colours, contrasting elements, and unique perspectives within a single frame.

By emphasizing original photography and allowing creative freedom in choosing the subject, the event encouraged participants to transform ordinary festive moments into visually engaging photographs — combining creativity, cultural expression, and student engagement as a meaningful addition to the Onam celebrations organized by TinkerHub SBCE.

Overall, Frames of Onam celebrated the festival not just through its colours, but through the diverse perspectives and creativity of the participants behind every frame.
