

Unpaid Opinion

A Weekly Talk Series by TinkerHub SBCE — Report

Event Name	Unpaid Opinion (Weekly Talk Series)
Organized By	TinkerHub SBCE Pattoor
Speaker	Alaina Sara Sam
Topic	Is technology leading us, or are we leading technology?
Date	17 September 2026
Time	01:30 PM
Venue	Sree Buddha College of Engineering, Pattoor

Event Overview

Unpaid Opinion is a weekly talk series conducted by TinkerHub SBCE Pattoor, where students come together to share ideas and perspectives. This session was based on technology, with one main question: **is technology leading us, or are we leading technology?** The speaker, **Alaina Sara Sam**, first shared their point of view on the topic. After that, all the members joined in for an open discussion and thought about the question together. One example raised during the discussion was how we pick up our phone to check notes, but end up on Instagram, WhatsApp and other social media and waste our time. This was one point of view that made everyone reflect on their own habits.

Objectives

- To give students a platform to share and listen to different opinions.
- To encourage open discussion on whether technology leads us or we lead technology.
- To help students reflect on their own daily use of phones and social media.
- To build confidence in speaking and expressing views in front of peers.
- To continue the weekly Unpaid Opinion talk series of TinkerHub SBCE.

Students listening and applauding during the session

Outcome

The session successfully brought students together to think about the role of technology in daily life. The speaker shared their point of view, and the open discussion that followed gave every member a chance to take part. Through examples like opening the phone for notes and ending up on social media, students reflected on whether technology is leading us or we are leading technology.

Conclusion

The Unpaid Opinion session on technology was an engaging and thought-provoking addition to the weekly talk series by TinkerHub SBCE. It encouraged students to speak, listen and question how they use technology in their everyday lives.
