

O-Penn Mic 2.0 (Part 2)

TinkerHub Community Meetup — Event Report

Event Name	O-Penn Mic 2.0 (Part 2)
Organized By	TinkerHub SBCE Pattoor
Date	13th August 2026
Time	8:00 PM – 9:00 PM
Venue	Online (Google Meet)

Event Overview

The session was hosted by Adithya S (Women in Tech Lead) as an exclusive, safe space for women to speak, express, question, create, and break free from societal expectations under the theme "Breaking the Box: What if the box was never meant to hold you?"

The host initiated the event by elaborating on the core concept of 'the box' — the self-imposed and societal boundaries, gender roles, and restrictive expectations placed on women. The discussion inspired attendees to question these boundaries and step out of their comfort zones.

Following this, the host opened the floor to participants to share their own experiences. The attendees reflected on what 'the box' meant to them personally, revealing common constraints such as fear of failure, social judgment, imposter syndrome, and societal conditioning. Through this open dialogue, five primary challenges faced by most participants were identified: fear of judgment and public criticism, imposter syndrome and self-doubt, pressure to conform to societal expectations, perfectionism leading to fear of failure, and hesitation to speak up or express original ideas.

To transform these mental blocks, an engaging activity named 'Flip It' was conducted, where participants were asked to take a negative belief or fear and reframe ('flip') it into a positive, empowering statement — for example, flipping "I am afraid of judgment" into "My voice and perspectives are valuable."

The session concluded with an empowering summary emphasizing self-expression, confidence, and mutual support among women.

"Your voice. Your story. Your rules. Break the box. Be Unboxed."

Objectives

- To create an inclusive and safe environment where female students can voice their true feelings and experiences without fear of judgment.
- To identify and discuss common societal and psychological barriers ('boxes') faced by women in academic and professional spaces.
- To introduce active mindset reframing techniques like the 'Flip It' exercise for building resilience and confidence.
- To normalize conversations around imposter syndrome and self-doubt.
- To build a supportive peer network among participants.

Event Highlights

Outcome

- **Empowered Peer Dialogue:** Participants actively engaged in sharing personal fears and struggles, fostering a sense of community and solidarity.
- **Mindset Reframing:** Through the 'Flip It' activity, attendees learned practical cognitive techniques to convert self-doubt into actionable confidence.
- **Increased Self-Awareness:** Defining the 5 core problems helped participants realize that their fears are widely shared, lowering personal isolation.
- **Positive Engagement:** The interactive format ensured high participation and meaningful interactions throughout the 1-hour session.
- **Boosted Confidence:** Attendees left with practical tools and a stronger belief in the value of their own voice and perspective.

Conclusion

The 'O-Penn Mic 2.0 (Part 2) — Breaking the Box' session successfully provided an engaging, empathetic, and constructive space for female participants. By combining structured discussions with interactive activities like 'Flip It', the event empowered attendees to recognize their worth, break past self-limiting boundaries, and cultivate genuine self-confidence.
